SEARCHING

Scarching:

- Searching is a process of finding a given value position in a list of values.

- It decides whether a search key is present in the data or not

- It is a algorithmic process of finding particulare item in a collection of items.

Searching Techniques: -

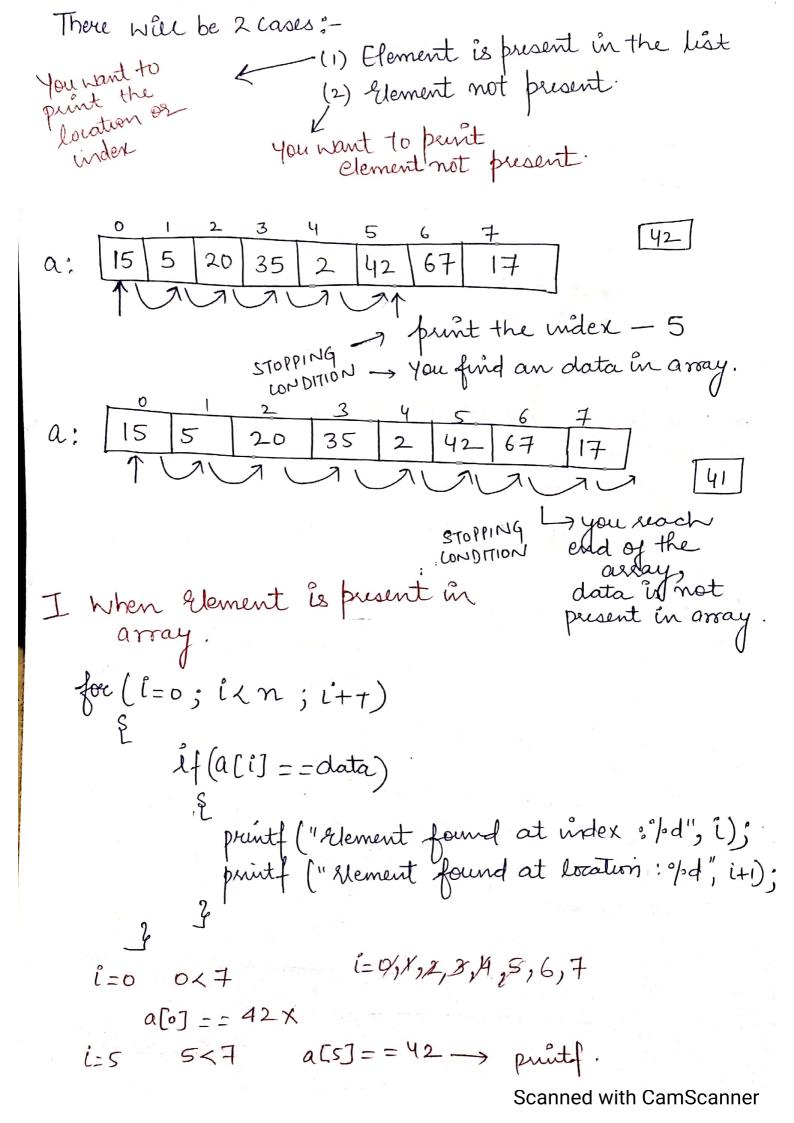

To search an element in guien away, it can be done in following ways:

- (1) Sequential Scarch | Linear Search
- (2) Interval Search | Binary Search.

SEQUENTIAL SEARCH

- sequential search starts at the beginning of the list and checks every element of the list.
- It is very simple and basic search algorithm
- Sequential search compares the element with all the other elements given in the list. If the element is matched, it returns the value index, else it returns -1.

E WE									
<u>Ex:-</u>	0 1	20	32	4	5 42	67 17	m=8		
		11				data	=42		

f (i = = n)

Sprintf ('Rement not found");

3

Best Case: - O(1) Worst lase: - O(m)

Average Case:
$$-\frac{\sum \text{all cases}}{n \sigma' \sigma' \text{ cases}}$$

$$\frac{1+2+3+---+n}{n}$$

$$\frac{2n(m+1)}{2n}$$

$$= O(\frac{m+1}{2})$$

BINARY SEARCH

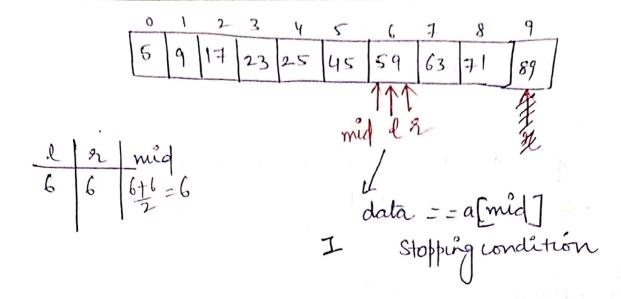

- These algorithms are specifically designed for searching in sorted data.
- These types of searching are much more efficient than linear search as they repeatedly target the center of the search structure and divide the search space in half.

- Array should be sorted if you want to apply binary search but in linear search this is not the condition, you can have either sorted or unsorted list.
- Divide and conquer technique means divide the array into two halfs → recursively divide the array

Now, we will see how it securisively divide the array, ie we are going to find the middle value $a = \begin{bmatrix} 0 & 1 & 2 & 3 & 4 & 5 & 6 & 7 & 8 & 9 \\ \hline 0 & 1 & 1 & 1 & 2 & 3 & 4 & 5 & 6 & 63 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 5 & 9 & 17 & 23 & 25 & 45 & 69 & 63 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 63 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 63 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 63 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 63 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 63 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 63 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 63 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 63 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 63 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 63 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 63 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 63 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 63 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 63 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 63 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 63 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 63 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 63 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 63 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 63 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 6 & 63 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 6 & 63 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 6 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 & 2 & 3 & 4 & 5 & 6 & 71 & 89 \end{bmatrix}$ $a = \begin{bmatrix} 1 & 1 &$
